Deadline for manuscript  
submissions:

**31 July 2020**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue is devoted to recent advances in nanostructure studies and applications that have been developed in various fields of science and industry. Nanomaterials are already used in electronics, medicine, biology, sensors, catalysis, and spectroscopy. They are used in the form of nanocrystals, nanoceramics, glasses, colloids, composites, or thin films. These materials, due to the extraordinary properties obtained at the nanoscale, show unusual physical properties—different from those at the macroscale. Many of us study the chemical, biological, and physical properties of these nanomaterials. We see their unusual spectroscopic, magnetic, antimicrobial, or chemical properties. We try to understand the interaction between the size, morphology, and surface of nanomaterials with their properties. We try to modulate them to be able to use these materials in various applications. Thanks to this, nanotechnology is still a field undergoing intensive development in which you are an expert. Therefore, for the upcoming issue, I would like to ask you to present your latest studies on different types of nanostructures and their applications.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

James McGill Professor,  
Professor of Biomedical  
Engineering, Professor of  
Bioengineering, Professor of  
Experimental Surgery,  
Department of Biomedical  
Engineering, Faculty of  
Medicine/Faculty of Dentistry,  
Duff Medical Science Building,

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers fourteen comprehensive topics: Biomaterials; Energy Materials; Composites; Structure Analysis; Porous Materials; Manufacturing Processes; Advanced Nanomaterials; Smart Materials; Thin Films; Catalytic Materials; Carbon Materials; Materials Chemistry; Materials Physics; Optics and Photonics; Corrosion; Building Materials. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles.

*Materials* provides an unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex and other databases. Citations available in PubMed, full-text archived in PubMed Central.

**CiteScore** (2018 Scopus data): **3.26**, which equals rank 97/439 (Q1) in 'General Materials Science'.
